

ClassMate Release Plan

Product Name: ClassMate

Team Name: ClassMate

Release Name: 1.0

Release Date: Mar 11, 2025

Team Members: Conner Tusso, Michael Tan, Christopher Valladares, Kira Liao, Shreyas Gupta, Noel Ball

High level Goals

1. Find and Connect with Students:

- Users can search for and connect with other students who have similar or matching classes.
- Facilitates arranging study sessions and building academic networks.

2. Account Registration and Class Upload:

- Users can register for an account and link it to Canvas to automatically upload their class schedules.
- Reduces manual setup and enhances ease of use.

3. Simplified User Onboarding:

- Options to link existing calendars (e.g., Google Calendar, Outlook) to streamline the setup process.

4. User Roles:

- Users can have roles such as:
 - Student
 - Tutor
 - Instructor

5. Teaching Staff Study Groups:

- Study groups created by teaching staff will:
 - Restrict permissions for students to ensure academic integrity.
 - Provide easier access to discussions and materials from office hours or sections.

6. Study Group Management:

- Study groups will enable users to:
 - Organize and track study notes.
 - Collaborate effectively within a shared space.

7. Messaging:

- Users can send messages to one another for direct communication.

8. Schedule Sharing:

- Users can create and share their availability schedules with others to simplify meeting planning.

9. Group Creation and Meeting Facilitation:

- Users can create groups with other users to:
 - Communicate collectively.
 - Schedule and organize meetings seamlessly.

User Stories

Sprint 1: Jan 15, 2025 - Jan 28, 2025

Priority	User Story ID	User Story Description	Story points
1	1.1	As a student who wants to connect to other students, I want an authenticated platform to find them • Task 1: Set up backend for user authentication and registration (4) • Task 2: Allow users to register using email and create an account (4) • Task 3: Create frontend UI for login and registration (4) • Task 4: Design and develop the post-login landing page (4) • Total Time Estimate: 16 hours	8
2	1.2	As a student who wants to find people with similar interests, I need to be able to showcase my bio on my profile • Task 1: Implement profile editor frontend that allows users to add/edit their bio (4) • Task 2: Develop backend support for user profiles (4) • Task 3: Design and build the profile page UI (4) • Total Time Estimate: 12 hours	5

Sprint 2 Jan 29, 2025 - Feb 11, 2025

Priority	User Story ID	User Story Description	Story points
1	2.1	As a student, I want to be able to store all of the classes I'm taking so that I can compare them with other students • Task 1: Create endpoints and database tables to store classes (6) • Task 2: Build a user-friendly UI for adding/removing classes in the profile (6) • Total Time Estimate: 12 hours	12
2	2.2	As a student studying for my classes, I want to find others in the same situation so we can study together • Task 1: Build UI for My Study Groups page (2) • Task 2: Build UI for Explore Page with search bar UI (2) • Task 3: Set up database schema for study groups (6) • Task 4: Retrieve study groups based on user search/filter (6) • Total Time Estimate: 16 hours	16
3	2.3 (From Sprint 1)	As a student who wants to find people with similar interests, I need to be able to showcase my bio on my profile • Task 1: Implement profile editor UI that for editing profiles (4) • Task 2: Develop schemas for user profile (4) • Task 3: Implement profile page UI when viewing user profiles (4) • Total Time Estimate: 12 hours	12

Sprint 3 Feb 12, 2025 - Feb 25, 2025

Priority	User Story ID	User Story Description	Story points
2	3.1	As a student, I want to be able to send messages to discuss material and meet my study group • Task 1: Set up messaging backend and build web socket-based infrastructure for real-time messaging (9) • Task 2: Set up frontend messaging UI for group chats (8) • Total Time Estimate: 24 hours	17
3	3.2	As a student trying to create a study group, I want to be able to display my group to attract potential members • Task 1: Set up a study group creation tool to allow users to create and customize groups (4) • Task 2: Allow users to join groups by searching for them and clicking them (4) • Task 3: Create a “My Study Groups page” to display groups the user is a part of (4) • Task 4: Create frontend UI for group creation (4) • Task 5: Set up database and endpoints for group data (4) • Total Time Estimate: 28 hours	20
3	3.3	As a student trying to meet my fellow classmates, I need a way to reach out to them easily • Task 1: Set up Friends tables and endpoints (4) • Task 2: Set up Friends frontend UI (4) • Total Time Estimate: 8 hours	8
4	2.1 (From Sprint 2)	As a student, I want to be able to store all of the classes I’m taking so that I can compare them with other students • Task 1: Create endpoints and database tables to store classes (4) • Task 2: Build a user-friendly UI for adding/removing classes in the profile (4) • Total Time Estimate: 8 hours	8
4	2.2 (From Sprint 2)	As a student studying for my classes, I want to find others in the same situation so we can study together • Task 1: Build UI for Explore Page with search bar (6) • Task 2: Implement profile editor UI for editing profiles (5) • Total Time Estimate: 11 hours	11

Sprint 4 Feb 25, 2025 - Mar 11, 2025

Priority	User Story ID	User Story Description	Story points
2	4.1	As a student, I want to easily find students to make study groups. • Task 1: Polish frontend, fix bugs, unify styles (12) • Total Time Estimate: 12 hours	12
3	4.2	As a student, I want the option of knowing what my classmates look like before reaching out to them. • Task 1: Allow images to be uploaded by users for their profile and by group owners for the group image (4) • Task 2: Add file size constraints (2) • Task 3: Add links to upload images (2) • Total Time Estimate: 8 hours	8
4	4.3	As a student, I want to be able to reach out to individual classmates to make study plans. • Task 1: Add a private messaging page/route (5) • Task 2: Make sure only 2 users can message at once (3) • Task 3: Add link when viewing users' profiles (2) • Total Time Estimate: 10 hours	10
5	4.4	As a student, I want to be able to easily leave study groups after I'm done participating in them. • Task 1: Add a leave group button to users who joined a group (2) • Task 2: Groups that have been left will be removed from My Groups page and return to the Explore page (2) • Total Time Estimate: 4 hours	4
1	3.1	As a student, I want to be able to send messages to discuss material and meet my study group • Task 1: Set up frontend messaging UI for group chats (10) • Total Time Estimate: 10 hours	10

Product Backlog

User Story Description
As a student , I want to know whether someone I'm talking to is also a student, a TA, or a professor, so I can understand how to interact with them and what kind of help or collaboration to expect.
As a student , I want to easily let others know when I'm free, so I can find people who are available to study at the same time as me.
As a new student , I want to start using the platform without feeling lost or overwhelmed, so I can quickly connect with others and start studying.
As a student , I want to join study groups that are organized or recommended by my professor or TA, so I can feel confident that I'm focusing on the right material and getting reliable help.
